

SDRP - 3 POINT SEEDER w/ PLASTIC CONE

Plastic Seeder

High Quality Plastic Cone
UV Resistant
Aluminum Housing Gearbox
500 lb. Capacity

IMPORTANT : PTO Shaft must remain level at all times to avoid Gearbox & Shaft damage!

500 lb. Max. Capacity

This seeder is shipped with adequate lubricant in the gearbox. Every 50-100 hrs. or if seal seepage occurs: Remove side plug and add grease (50% capacity). Every 10 hrs. : Grease u-joints and apply light oil on telescoping tube.

IMPORTANT: After every usage: Apply oil to shaft, bushing, and flow control plate.

The spreading chart furnished shows examples of approximate pounds per acre @ 450 rpm.

Example: Oat Seed - Lever block points to 2.5 on feed gauge at 5 mph. = 103 lbs. per acre.

This is a starting point only. Weight and size of the seed or fertilizer will drastically change this rate. Adjustments in ground speed and feed rate may be necessary.
